

Cisco IP Telephony Health Care Solution

Networking/ Security

Industry Issues:

Many Healthcare CIO's are under a great deal of pressure to reduce cost while at the same time delivery innovative technologies that create a competitive advantage and improve efficiencies.

As technology continues to play a critical role in major Healthcare institutions, IP Telephony is delivering significant value to many Healthcare organizations. The convergence of Voice and Data has proven to be a key technology for driving down cost and improving operational efficiencies.

In addition to reducing cost, the growing concerns around patient safety and changing regulations are forcing Healthcare organization to leverage technology to its fullest extent.

Moving to a 21st Century phone system, provides a platform for innovation, competitive advantage, cost savings and most important, a vehicle for providing improvements in the overall customer experience as well as patient safety.

Why Partner with CDI
