

Exchange Microsoft

Messaging Architecture Builds the Foundation

If your organization is like most, your messaging system is critical to your operations. Therefore, it is crucial that your Exchange design be solid, giving you the confidence that will provide secure highly-available business communications. Microsoft Exchange Server helps fast-growing companies unify an entire enterprise's email, scheduling, contacts and task management functions under one directory-driven, web accessible system.

As part of our best practices, CDI helps you prepare to migrate your enterprise messaging system to the latest Microsoft Exchange technologies. With this service, expert CDI professionals work collaboratively with your IT staff to review your design, incorporating their knowledge of the industries best practices and the latest advancements for high performance messaging.

The CDI team will help you:

- Analyze current infrastructure as well as the preparation of Microsoft Active Directory for Exchange
- Best Practices
- Design recommendations to optimize current services, security, anti-virus protection (server and client), scrubbing/analysis, inter-application interfaces, etc.
- Scalability
- Analyze current storage requirements and messaging retention/archival policies
- High Availability
- Design migration/coexistence plan with emphasis on availability and performance
- Coexistence with Lotus Notes and Groupwise
- Develop naming strategies, standards and conventions
- Validate your proposed strategies for improving service levels in areas such as business continuity, archiving for compliance, security, and disaster recovery.

The CDI Advantage

Leveraging CDI experience with the Microsoft Exchange service, allows you to confidently move forward in implementing an optimized enterprise messaging infrastructure. Investment in this service can help significantly advance the planning and strategy development, while creating the framework for a more effective, efficient and profitable Exchange architecture.

CDI is an IT infrastructure services company that lends knowledge, experience and credibility to helping companies facilitate communications and collaboration between employees, partners and customers around the world.
