

About Computer Design & Integration

Computer Design & Integration LLC, provides comprehensive and innovative technology infrastructure services that solve complex business challenges. Recognized since 2000 as one of the top 500 IT solution providers in the United States, CDI's strategic differentiation is its commitment to understanding our clients' business processes and helping them advance their corporate strategies using technology—with a particular focus on highly available data center solutions.

Founded in 1995, more than 80 percent of our 500 customers hail from the financial services, pharmaceutical, healthcare, and media and entertainment industries. What's more, a vast majority of these customer relationships are ongoing. Our clients have confirmed that our quality, customer service and ability to complete projects on time and on budget are what keep them coming back.

CDI's skillset in the design, integration and support of data center infrastructure solutions is informed by strategic alliances and partnerships with Cisco Systems, EMC, Hewlett-Packard, IBM, Microsoft, Oracle, Sun Microsystems, Symantec, and VMware. These relationships ensure we can offer cutting-edge, quality technology for complete solutions in Backup and Recovery, Business Continuity, Consolidations, Data Center Optimization, Cisco IP Telephony and Unified Communications, Managed Services, Networking / Security, Storage and Virtualization. Our operating systems expertise is extensive, encompassing Microsoft as well as leading Unix and Linux platforms.

Over the last 14 years, CDI has completed over 1,000 projects without error or disruption of service. 95% of our clients are repeat customers

“Customers turn to CDI because they know we offer a wider, fuller breadth of data center services than our competitors. While we may start with specific projects focused on just one critical aspect of a company's needs, we can scale as they scale, ensuring continuity in their technology strategy”

Eric Bakker
Co-Founder & President

and more than 90% of our clients come from referrals. Our professional staff of more than 90 certified experts in Teterboro, New Jersey, and New York City is uniquely positioned to assist in a wide range of functions and tasks. Each engagement is orchestrated upfront by a pre-sales solutions architect, who will design the most appropriate solution for your business. Companies challenged by limited resources can turn to CDI's award-

winning Professional Services Group, which effectively becomes an extension of their IT staff. Project Management expertise is a key differentiator of our experienced team—key accounts receive ongoing oversight from a project manager certified by the Project Management Institute to ensure the highest degree of completion success and on-time performance. Once an implementation is complete, our Managed Services keep tabs on your infrastructure investments, providing valuable performance metrics and capacity planning data.

Well-documented customer service expertise, project management discipline and deep technical experience are the foundations upon which CDI's long-standing success is built. Since we were founded in 1995, our agenda has been our customers' agenda: to simplify the complexity of information technology, to boost operating efficiencies, to stimulate revenue growth, to anticipate and respond to ever-evolving business needs. We focus on using technology so that our customers can maintain a competitive, global business advantage—now, and in the future.
