

Computer Design and Integration Managed Services (CDI MS LLC) Successfully Completes Service Organization Control 2, Type 2 Examination

Certification ensures clients' mission-critical data security and availability

Roswell, GA ([PRWEB](#)) September 23, 2014 -- [CDI MS LLC](#), a leading managed services and cloud computing provider, today announced the successful completion of a Service Organization Control (SOC) 2, Type 2 examination. This certification process places CDI MS LLC in an elite group of managed service providers. Seeking a key differentiator in the managed services industry, the successful SOC 2 examination demonstrates CDI MS LLC's commitment to operating as a leader featuring the highest level of standards in data security and availability.

The examination, initiated by the firm in October of 2013, reviewed and tested the design and operating effectiveness of CDI MS LLC's processes and procedures that are in place to support the security and availability of the CDI MS LLC Cloud and Managed Services' offerings.

"This is a very important benchmark as CDI MS LLC continues its record growth. We want our clients to know about our commitment to handling all aspects of their data with integrity," said John Carter, president, CDI MS LLC. "Trust is essential to a great working relationship, whether the client is a small business or a large public or private enterprise. They want to know that their IT outsourcing partner is capable, competent and operating with prudent procedures that are tested by an independent, third party on a regular basis," he added.

SOC 2 examinations are growing in necessity and are being used by customers, prospects and financiers to gain an understanding of the control environment of technology outsourcing companies. The attainment of this premier certification allows CDI MS LLC to provide organizations with this high level of assurance about the quality of their data center security and availability and uphold the stringent processes required of managed service providers.
