## RELIABLE AND SECURE BACKUP WITHOUT COMPLEXITY

From the most complex and rigorous data replication specifications, to restoring and recovering SLAs, CDI's **Backup-as-a-Service** (BaaS) is a modern alternative to traditional backup approaches. It offers fast and efficient backup for servers, virtualized environments, remote locations, NAS devices, desktops/laptops/mobile devices and complex applications utilizing secure and compliant data centers.

Whether you've reached the limits of your on-premises backup, or just can't invest resources into an in-house infrastructure, we provide a complete BaaS and recovery solution.

SERVICE HIGHLIGHTS AND ADVANTAGES

SCALABILITY: Only pay for the capacity needed

WHITE GLOVE SUPPORT: Each client has a dedicated service delivery manager and 24x7 NOC access

COST EFFECTIVE: Predictable monthly pricing and reduced costs

SEAMLESS BACKUP: Servers, virtualized environments, remote locations, NAS devices, desktops/laptops/mobile devices and complex applications

FULLY COMPLIANT: SOC II type II certified, FINRA-compliant data center storage facilities

WHITE GLOVE SUPPORT: Each client has a dedicated service delivery manager and 24x7 NOC access

COST EFFECTIVE: Predictable monthly pricing and reduced costs

SIZE REDUCTION: Size reduction of backup data at client site prior to transfer ensures speedy backups that won't drain your bandwidth

AGILE AND SECURE: Flexibility to develop backup models based on your requirements, applications, and locations, with the option to backup onsite with secure, encrypted replication, off-site, or entirely to the cloud

HOLISTIC REPORTING: You'll receive a monthly usage report, including trend analysis and insight, allowing your business to make any changes necessary to the devices you've chosen to backup

OFF-SITE REPLICATION AND RECOVERY: Inherent protection of your apps and data, designed to easily recover your assets in the event of a disaster

Stop managing backups and start protecting your data

CDI Managed Services provides flexible resources to leverage as an extension of your IT operations. From monitoring and management, to an as-a-service cloud-based catalog, we can tailor a solution to maximize your current resources and reduce the cost and complexity of running in-house data protection.
